

# Website Planning

By Ismail.R

# Website Ideas:

These are different ideas I had for my website. I experimented with these ideas to see which one would be the best for my website.

1. Tourist Attractions of India
2. History of India
3. Understanding Cricket
4. How to cook butter chicken
5. How to cook spaghetti

# Refining my idea

The idea I chose was “Tourist attractions of India”. Here, I have provided information on why I chose this idea.

**Who:** Tourists visiting India and wanting to explore India.

**What:** Different pictures with information underneath to inform them about the attractions.

**Why:** A website explaining to tourists about India and its different attractions.

**How:** It will allow tourists to know more about Indian tourist attractions and know what to expect when visiting India.

# Statement of intent

I intend to make a website about different tourist attractions in India because I am familiarized with India and its attractions because it is also my birthplace . This topic interests me because of the variety and diversity of tourist attractions that are in India and the information about it can be learnt and provided. The information that is going to be gathered will pose no difficulty because the information is provided online for these tourist attractions.

My website will include different photos of the tourist attractions and there will be information underneath the photos describing what it is, its architecture and history. It would also include different links to youtube videos for more information about the tourist attraction to make the viewer learn more about it. It would also include a simple paragraph before I provide the information about the attractions. This will be an introduction about India and its tourism. I will also be providing an additional paragraph after the information to give a brief overview of the website and links to more information about the attractions.

From visiting my website I want people to learn more about the tourist attractions and give them a piece of what to expect from Indian culture when visiting India. I also want the viewer to learn something more about exploration of culture, diversity and its significance.

# Existing Design 1

1. I like how the design of the information is laid out in a neat and formal way.
2. I don't like them including links to different social platforms they are on because it would catch the person off guard on the website.
3. This would help me give ideas for what I need to include. For example, I could write a brief paragraph about India's tourist attractions and then list the attractions.

India is a vibrant land of startling contrasts where both the traditional and modern worlds meet. The world's seventh largest nation by area and the second largest in terms of population, India boasts a rich heritage that's the result of centuries of different cultures and religions leaving their mark.

Things to do in India include the opportunity to experience an array of sacred sites and spiritual encounters, while nature lovers will enjoy its sun-washed beaches, lush national parks, and exciting wildlife sanctuaries.

From the magnificent Taj Mahal in Agra to the holy sites of Harmandir Sahib (formerly the Golden Temple) in Amritsar and the Mecca Masjid mosque in Hyderabad, visitors to this exotic country will discover a trove of spiritual, cultural, and historical treasures.

To help you make the most of your time in this amazing country, refer often to our list of the top tourist attractions in India.

### 1. The Taj Mahal, Agra

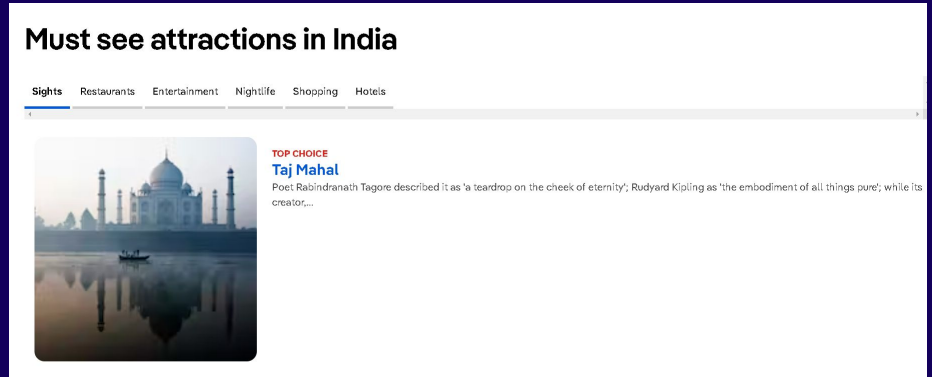

The Taj Mahal, Agra

# Existing Design 2

1. I like how it also shows other attractions rather than just the buildings but also the restaurants as well.
2. I don't like the amount of information that has been provided.
3. I would apply more things on the website and include more stuff than just different buildings.

# Existing Design 3

1. I like how it includes links for the person to gain more interest in the website.
2. I don't like how it shows the words like Accommodation and Read More because it already shows what it does on the link.
3. I would include the links to other things to show a variety of things on the website.

# Logo Sketch Drawing

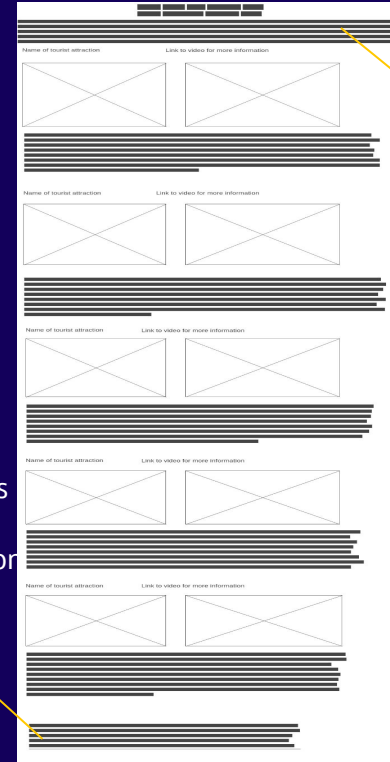

These are the four different sketches I made and chose one of them to be my favicon logo.

# Sitemap

# User Persona (Adult)

As a student attending Tempe High School, I want to create a website which informs a person (adult) about the scenic attractions of India and where to visit the area while in India. I want the user to want to want to go to India because of the way I have described the scenic attractions. As an adult who doesn't want to spend a lot money I want the tourist site to be an exciting place to visit, somewhere you are willing to spend money on. So that is why I am making this website, to make feel adults willingly spend money to visit these tourist attractions and also a sense of the diversity of Indian culture.

# User Persona (Kid)

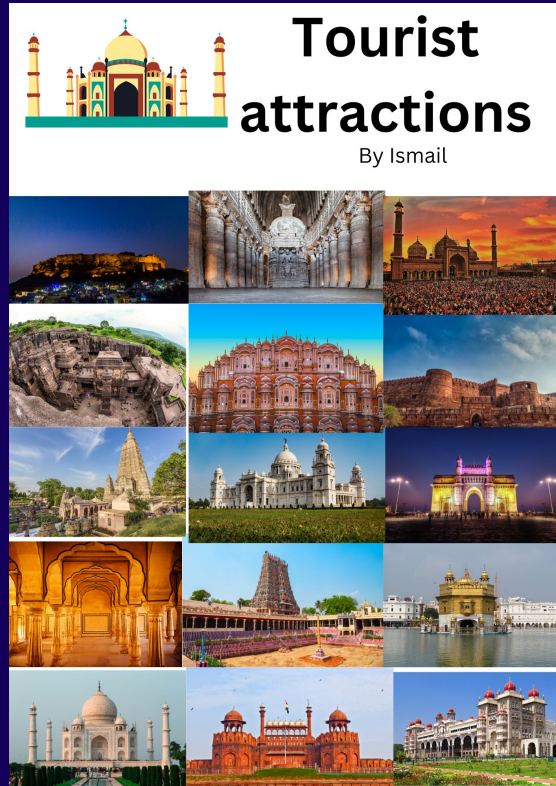

As a student attending Tempe High School, I want to create a website which informs a kid about the scenic attractions of India and how cool it would be to visit the area. I want the kid to want to go to India because of the way I have described the scenic attractions. As a kid who always enjoys fun things, I want the child to explore the tourist site and be an exciting place to visit. So that is why I am making this website, to make feel kids joy and happiness and also learn the diversity of Indian culture.
